

What is the quality of water in our environment?

- [pH](#)
- [Alkalinity](#)
- [Dissolved Oxygen](#)
- [Water Transparency](#)
- [Water Temperature](#)

Look at all that data!!!

SODA Webinar #1

November 6, 2017 at 8:00pm ET
(November 7, 2017 at 1:00am UTC)

Getting Science Done with Shumate Middle School featuring Teacher, [Jeff Bouwman](#).

SODA Event Data Collection Time Period:
October 2017.

Jeff Bouwman, a science teacher at the Shumate Middle School in Gibraltar, Michigan USA is no stranger to getting his students involved in collecting hands-on data. Jeff also has students monitoring automatic environmental data coming into Shumate's WeatherSTEM weather station. Come and hear all about how Jeff's students are exploring ENSO Phase III's Guiding Investigative Questions, during this SODA Event. Learn how Shumate Middle School is #GettingScienceDone and how you might be able to collaborate with Jeff and his students.

Next ENSO Phase III Monthly Science and Research Webinar

Webinar #3: Tues., Nov. 14th time 19:30 UTC, focus on Europe and Eurasia

- SME: “Water Quality in Poland, Croatia, and Switzerland” - share how NASA datasets inform our understanding about water quality in Europe and Eurasia
- Collaboration: Best Practices from a few teachers who are using hydrology protocols; have a few teachers-using both GLOBE and non GLOBE resources; ideas for potential collaborations on this question between schools; what resources/support can we offer to enhance their collaboration, share how to use [MyNASAData](#) to explore this question using a sample lesson.
